THE RAILROAD THAT NEVER WAS
Vanderbilt, Morgan, and the South Pennsylvania Railroad
Herbert H. Harwood, Jr.
Herbert H. Harwood, Jr. tells the story of one of the most infamous railroad construction projects of the late 19th century. This 200-mile line through Pennsylvania’s most challenging mountain terrain was intended to form the heart of a new trunk line from the East Coast to Pittsburgh and the Midwest. Conceived in 1881 by William H. Vanderbilt, Andrew Carnegie, and a group of Pittsburgh and Philadelphia industrialists, the South Pennsylvania Railroad was intended to break the Pennsylvania Railroad’s near-monopoly in the region. The line was within a year of opening when J. P. Morgan brokered a peace treaty that aborted the project and helped bolster his position in the world of finance. The railroad right of way and its tunnels sat idle for 60 years before coming to life in the late 1930s as the original section of the Pennsylvania Turnpike. Based on original letters, documents, diaries, and newspaper reports, The Railroad That Never Was uncovers the truth behind this mysterious railway.

“An important story that deserves its rightful place in every railroad historian’s library.” —Kurt Bell, archivist, Pennsylvania State Railroad Museum

“Niemann’s . . . writing style is excellent and it leads the reader to want to read on. . . . She has clearly conveyed her experiences as a railroad worker.” —William D. Middleton, co-editor of The Encyclopedia of North American Railroads

“I’ve read many books on railroading and none of them have moved me in the way this book has. The photography is stunning, along the lines of Delano’s work of the ’30s and ’40s.” —Mitch Markovitz, veteran railroader, illustrator

TWILIGHT OF THE GREAT TRAINS

Fred W. Frailey

“Frailey’s book is an excellent job. . . Of all those ‘last years’ books, it’s by far the best.” —Herbert H. Harwood, Jr.

“Fred Frailey is by far one of the best writers in the railroad book business.” —William D. Middleton, Jr.

FROM TELEGRAPHER TO TITAN
The Life of William C. Van Horne

Valerie Knowles

William C. Van Horne, a true titan of North American business, started his railroad career at the age of 12 working various jobs for the Michigan Central, and crowned it by becoming the president of the Canadian Pacific. He is credited with opening Cuba’s interior by means of railway, greatly expanding Canada’s interests by launching the sea transport division of the Canadian Pacific—with regular luxury liner service between Vancouver and Hong Kong—and completing Canada’s first transcontinental railway. Van Horne was knighted by Queen Victoria for his contributions to Canadian Unity and, more recently, was named Laureate of the Century by the Canadian Business Hall of Fame. A man of many talents, Van Horne was also Canada’s premier art collector and one of its leading financiers. In From Telegrapher to Titan, Valerie Knowles delivers a gripping account of this larger-than-life figure.

“Given the subject’s significance . . . I think Indiana University Press has an opportunity . . . to fill an inexcusable void in both railroad and Canadian history.” —Herbert H. Harwood, Jr.

FRANK JULIAN SPRAGUE
Electrical Inventor and Engineer

Frank Julian Sprague invented a system for distributing electricity to streetcars from overhead wires. Within a year, electric streetcars had begun to replace horsecars, sparking a revolution in urban transportation. Sprague (1857–1914) was an American naval officer turned inventor who worked briefly for Thomas Edison before striking out on his own. Sprague contributed to the development of the electric motor, electric railways, and electric elevators. His innovations would help transform the urban space of the 20th century, enabling cities to grow larger and skyscrapers taller. The Middletons’ generously illustrated biography is an engrossing study of the life and times of a maverick innovator.

Unbeknownst to most, reigning financial power J. Pierpont Morgan was behind the funding of the line.
